DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Norman Brunell on 13 February 2008.
3. The application has been amended as follows:

IN THE CLAIMS:

Claim 1 (Currently Amended) A hydrogen gas generating system, comprising:
a membrane electrode assembly including an anode, a cathode and an ionically conductive membrane there between;
electrical connections for applying electrical power from a source of electrical power to said cathode and anode; and
a non-circulating transport layer of wicking material for transferring a water/fuel mixture by capillary action from a first end portion of the layer of wicking material from a source of the water/fuel mixture to said anode to generate hydrogen gas and for transferring gases released by consumption of the water/fuel mixture away from the anode by capillary action to a vent through a second end portion of the layer of wicking

~~material, the second end portion of the layer acting as a barrier to the transport of the water/fuel mixture to the vent.~~

Claim 5 (Currently Amended) The hydrogen gas generating system of claims 2 or 3, wherein said first end portion of the layer of wicking material is hydrophilic; and said second end portion of the layer of wicking material is hydrophobic, ~~whereby the second end portion of the layer of wicking material acts as the barrier to the transport of the water/fuel mixture being transported in said first end portion of the layer of wicking material, from being transported to the vent for the released gases.~~ "

Allowable Subject Matter

4. Claims 1-5, 8 and 21 are allowed.
5. The following is an examiner's statement of reasons for allowance: In regards to claim 1, none of the prior art teach, suggest or disclose a hydrogen gas generating system comprising a non-circulating transport layer of wicking material for transferring a water/fuel mixture by capillary action from a first end portion of the layer of wicking material from a source of the water/fuel mixture to said anode to generate hydrogen gas and for transferring gases released by consumption of the water/fuel mixture away from the anode by capillary action to a vent through a second end portion of the layer of wicking material. Kinkelaar et al. (US 2004/0001991 A1) does disclose a hydrogen gas generating system that comprises a non-circulating fuel transport system using capillary action that comprises both hydrophilic and hydrophobic layers, but as separate layers. Kinkelaar et al. does not teach, disclose or suggest wherein a single layer has

hydrophobic and hydrophilic portions that transport gases and fuel/water mixtures by capillary action, respectively.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
